

- Q1. What is static memory allocation?
- Q2. Explain **TWO (2)** types of variables that are statically allocated.
- Q3. Describe **THREE (3)** properties of statically allocated variables.
- Q4. State **TWO (2)** types of variables that are allocated in the stack memory.
- Q5. Discuss the purpose of a Java Stack.
- Q6. Describe the **THREE (3)** steps a Java Stack is used when a method is invoked.
- Q7. What is dynamic memory allocation?
- Q8. Compare and contrast between explicit and implicit memory allocator.
- Q9. Explain the term Java Heap.
- Q10. Differentiate between stack and heap memory.
- Q11. Differentiate between static and dynamic memory allocation.
